

PYTHON FULL STACK DEVELOPMENT

Professional Training Program

Odisha Computer Application Centre (OCAC)

Government of Odisha Initiative

Electronics Niketan, 6 Olx Area, Bhubaneswar - 751012

TRANSFORM YOUR CAREER WITH INDUSTRY-READY SKILLS

Join OCAC's comprehensive Python Full Stack Development program and become a complete software developer ready to build modern web applications from scratch. This program is designed to take you from beginner to job-ready professional in just a few months.

WHY CHOOSE THIS PROGRAM?

Government-Backed Excellence

OCAC has been the premier IT training institution in Odisha for over 30 years, providing quality education backed by the Government of Odisha. Our certifications are recognized across industries nationwide.

Complete Career Solution

Unlike basic courses, this program covers EVERYTHING you need - front-end, back-end, databases, deployment, and real-world project experience. You'll graduate as a complete developer, not just someone who knows one language.

Industry-Aligned Curriculum

Our curriculum is designed in consultation with leading tech companies and industry experts. We teach what employers actually need, ensuring you're immediately employable after completion.

Placement Support

We provide dedicated placement assistance, resume building workshops, interview preparation, and connections with our network of hiring partners.

Affordable Investment

As a government institution, we offer subsidized training fees that are significantly lower than private institutes, making quality education accessible to all.

COURSE CURRICULUM

Module 1: Python Programming Fundamentals (Duration: 4 Weeks)

Master the Foundation

Introduction to Python and programming basics. Variables, data types, and operators. Control structures - conditionals and loops. Functions and modular programming. Data structures - lists, tuples, dictionaries, and sets. File handling and exception management. Object-oriented programming concepts. Classes, objects, inheritance, and polymorphism. Working with modules and packages. Introduction to Python standard library.

What You'll Build: Console-based applications, file management systems, basic automation scripts.

Module 2: Advanced Python & Backend Development (Duration: 5 Weeks)

Build Powerful Server Applications

Advanced Python concepts and techniques. Working with databases using Python. SQL fundamentals and database design. Introduction to web development concepts. Django framework - the complete web framework. Building RESTful APIs with Django REST Framework. Authentication and authorization systems. User management and security best practices. Session management and cookies. Working with Django ORM for database operations. Flask framework for microservices. API testing and documentation. Integration with third-party services.

What You'll Build: Complete backend systems, RESTful APIs, authentication systems, database-driven applications.

Module 3: Front-End Development (Duration: 5 Weeks)

Create Beautiful User Interfaces

HTML5 fundamentals and semantic markup. CSS3 styling and layout techniques. Responsive web design principles. CSS frameworks - Bootstrap and Tailwind CSS. JavaScript fundamentals and ES6 features. DOM manipulation and event handling. Asynchronous JavaScript and AJAX. Introduction to React.js framework. Components, props, and state management. React hooks and lifecycle methods. Building single-page applications. Form handling and validation. API integration in React. Responsive and mobile-first design.

What You'll Build: Modern responsive websites, interactive web applications, single-page applications with React.

Module 4: Database Management (Duration: 3 Weeks)

Master Data Storage Solutions

Relational database concepts. PostgreSQL and MySQL databases. Database design and normalization. Complex queries and joins. Indexing and performance optimization. NoSQL databases introduction. MongoDB basics and operations. Database security and backup strategies. Data migration techniques. Working with ORMs and database tools.

What You'll Build: Optimized database schemas, complex data queries, database-backed applications.

Module 5: Version Control & Collaboration (Duration: 2 Weeks)

Work Like Professional Developers

Git fundamentals and workflow. GitHub for code collaboration. Branching and merging strategies. Pull requests and code reviews. Managing conflicts and resolving issues. Team collaboration best practices. Open source contribution guidelines.

What You'll Build: Well-maintained code repositories, collaborative project workflows.

Module 6: Deployment & DevOps Basics (Duration: 3 Weeks)

Take Your Applications Live

Cloud computing fundamentals. Introduction to AWS and cloud platforms. Server configuration and management. Deploying Django applications. Deploying React applications. Domain and hosting setup. CI/CD pipeline basics. Container basics with Docker. Application monitoring and logging. Performance optimization techniques. Security best practices for production. Troubleshooting and debugging production issues.

What You'll Build: Fully deployed live web applications accessible on the internet.

Module 7: Capstone Project (Duration: 4 Weeks)

Build Your Portfolio

Work on a complete real-world project from concept to deployment. Apply all learned skills in an integrated manner. Work individually or in teams. Present your project to industry professionals. Receive feedback and refine your work. Build a portfolio piece to showcase to employers.

What You'll Build: A complete, production-ready full-stack application demonstrating all your skills.

LEARNING OUTCOMES

By the end of this program, you will be able to:

Technical Mastery: Write clean, efficient Python code. Build complete web applications from scratch. Design and implement databases. Create responsive, modern user interfaces. Deploy applications to production servers. Use Git for version control and collaboration. Debug and troubleshoot complex issues. Optimize application performance.

Career Readiness: Build a professional portfolio with multiple projects. Understand software development lifecycle. Work effectively in team environments. Communicate technical concepts clearly. Follow industry best practices and coding standards. Prepare for technical interviews. Understand job market requirements and trends.

Real-World Skills: Develop problem-solving abilities. Learn to research and find solutions independently. Manage project timelines and deliverables. Handle client requirements and feedback. Work with modern development tools and technologies. Adapt to new frameworks and libraries quickly.

WHO SHOULD ENROLL?

Complete Beginners

No programming experience? No problem! We start from absolute basics and build your skills progressively. If you can use a computer, you can learn to code.

Students & Fresh Graduates

Build in-demand skills before entering the job market. Stand out from the crowd with practical, portfolio-ready projects.

Career Switchers

Transition into the booming tech industry. We've helped professionals from diverse backgrounds successfully switch to software development careers.

Working Professionals

Upskill while working with our flexible batch timings. Evening and weekend batches available for working individuals.

Entrepreneurs & Business Owners

Learn to build your own tech products. Understand technology better to manage development teams effectively.

TRAINING METHODOLOGY

Hands-On Learning Approach

We believe in learning by doing. Every concept is immediately applied through practical exercises and mini-

projects. Less theory, more coding.

Live Interactive Sessions

Learn directly from experienced instructors in real-time. Ask questions, clear doubts, and engage in discussions during live classes.

Project-Based Learning

Work on multiple projects throughout the course, building your portfolio with each module. Every project simulates real-world scenarios.

Industry Expert Sessions

Regular guest lectures from working professionals in top tech companies. Learn about industry trends and best practices directly from the field.

Peer Learning Environment

Collaborate with fellow learners, participate in code reviews, and build professional networks that last beyond the course.

Lifetime Access to Resources

Get lifetime access to course materials, recorded sessions, and learning resources. Continue learning even after course completion.

Personalized Support

Dedicated mentor support for clearing doubts. One-on-one guidance for career planning. Resume and portfolio review sessions.

BATCH DETAILS & SCHEDULE

Batch Options

Weekday Morning Batch: Monday to Friday, 9:00 AM to 12:00 PM. Ideal for students and job seekers.

Weekday Evening Batch: Monday to Friday, 6:00 PM to 9:00 PM. Perfect for working professionals.

Weekend Intensive Batch: Saturday and Sunday, 10:00 AM to 5:00 PM. Designed for those with weekday commitments.

Fast-Track Batch: Monday to Saturday, flexible timings. Complete the course in shorter duration with intensive training.

Course Duration

Complete program duration: 6 months (approximately 26 weeks). Total training hours: 300+ hours of instructor-led sessions. Additional self-paced learning and project work.

Mode of Training

Hybrid Model Available: In-person classes at OCAC campus in Bhubaneswar. Online live classes for remote learners. Recorded sessions for revision and missed classes.

CERTIFICATION & CAREER SUPPORT

Official Certification

Upon successful completion, receive an official certificate from OCAC (Odisha Computer Application Centre), recognized by government and industries. Certificate includes course details, duration, and grade earned. Shareable digital credentials for LinkedIn and online profiles.

Placement Assistance

Dedicated placement cell connecting you with hiring companies. Resume building and LinkedIn profile optimization workshops. Mock interviews and technical interview preparation. Soft skills and communication training. Direct recruitment drives with partner companies. Freelancing guidance for those interested in independent work. Startup incubation support for entrepreneurial aspirants.

Post-Training Support

Access to alumni network and community. Continued career guidance and mentorship. Job opportunity notifications from our network. Lifetime access to updated course content. Free attendance in refresher workshops and seminars.

FEE STRUCTURE & PAYMENT OPTIONS

Investment in Your Future

Course Fee: Highly subsidized rates as a government initiative. Multiple payment installment options available. Early bird discounts for immediate registrations. Group enrollment discounts available. Scholarships for economically disadvantaged students.

Note: Exact fee details and payment plans will be shared during the registration process. Contact our admissions team for current pricing and available subsidies.

What's Included

All course materials and study resources. Access to learning management system. Software licenses and

development tools. Project hosting and deployment credits. Certificate upon completion. Placement assistance services. Alumni network access.

SUCCESS STORIES

Our Alumni Work At

Leading IT companies across India. Product-based companies like Amazon, Flipkart, and startups. Service-based companies like TCS, Infosys, Wipro, and Accenture. Government IT projects and departments. International remote positions. As successful freelancers and consultants. Running their own tech startups.

Salary Outcomes

Average starting salary: Six to Eight lakhs per annum. Top performers earn: Eight to Twelve lakhs per annum. Experienced alumni (2-3 years post-training): Twelve to Twenty lakhs per annum. Many alumni have achieved significant career growth within 1-2 years of completion.

CAREER OPPORTUNITIES AFTER COMPLETION

Job Roles You Can Apply For

Python Developer. Full Stack Developer. Backend Developer. Frontend Developer. Web Application Developer. Django Developer. React Developer. Software Engineer. Junior Software Developer. API Developer. Database Developer. DevOps Engineer (entry-level). Technical Support Engineer. Quality Assurance Engineer.

Industries Hiring Full Stack Developers

Information Technology and Software Services. E-commerce and Online Retail. Financial Technology (FinTech). Healthcare and Medical Technology. Education Technology (EdTech). Media and Entertainment. Travel and Hospitality. Government and Public Sector. Startups and Emerging Ventures. Consulting Firms.

Freelancing Opportunities

Build websites and web applications for clients. Develop custom business solutions. Create automation tools and scripts. Provide maintenance and support services. Work on international projects through platforms like Upwork and Freelancer. Set your own rates and work schedule.

FACULTY & MENTORS

Our instructors are experienced professionals with extensive industry experience. They bring real-world insights into the classroom, teaching not just theory but practical problem-solving approaches used in actual software development.

Each instructor has minimum 5 years of industry experience. Active practitioners working on current technologies. Passionate educators committed to student success. Available for doubt clearing and mentorship beyond class hours.

Guest faculty from leading tech companies regularly conduct special sessions on emerging trends, best practices, and career guidance.

INFRASTRUCTURE & FACILITIES

State-of-the-Art Learning Environment

Modern computer labs with high-speed internet. Latest software and development tools. Comfortable, air-conditioned classrooms. Library with technical books and resources. Project rooms for team collaboration. Cafeteria and break areas.

Learning Resources

Access to premium online learning platforms. Industry-standard development tools and software. Cloud computing credits for deployment practice. Code repository and collaboration tools. Learning management system with assignments and assessments.

ADMISSION PROCESS

Simple Four-Step Process

Step 1: Registration: Fill out the online registration form or call our admissions team. Provide basic details and choose your preferred batch.

Step 2: Counseling: Attend a free counseling session to understand the course in detail. Clarify any doubts and discuss your career goals. Receive guidance on batch selection and learning path.

Step 3: Enrollment: Complete the enrollment formalities. Submit required documents. Make payment (full or first installment).

Step 4: Start Learning: Receive your learning credentials and course materials. Join orientation session. Begin your transformation journey!

Documents Required

Valid government-issued photo ID (Aadhaar, PAN, or Driving License). Educational certificates (10th or 12th mark sheet). Recent passport-size photographs. Address proof.

FREQUENTLY ASKED QUESTIONS

Do I need prior programming experience?

No! This course is designed for complete beginners. We start from basics and build your skills progressively.

What is the minimum educational qualification?

Minimum 10+2 pass. However, anyone with basic computer literacy can join.

What equipment do I need?

A laptop or computer with internet connection. We'll guide you on software installation on day one.

Can I attend classes online?

Yes! We offer both in-person and online live classes. Choose what works best for you.

Will I get placement after the course?

We provide placement assistance, but job placement depends on your performance, interview skills, and market conditions. We prepare you thoroughly for the job market.

What if I miss a class?

All classes are recorded. You can watch missed sessions anytime. Additionally, you can attend the same session in another batch.

Is there any age limit?

No age limit. We welcome learners of all ages committed to learning.

Can I get a job while learning?

Many students start applying for jobs in the final months of training. Some get placed even before completing the course.

What is the refund policy?

Refund policy details will be shared during enrollment. Generally, refunds are available within the first two weeks of course commencement.

TAKE THE NEXT STEP

Your Future Starts Now

The tech industry is growing exponentially. Companies are desperately seeking skilled developers. The opportunity is NOW.

Every day you delay is another day you're not building your future. Every week you wait is another week someone else is getting ahead.

Limited Seats Available in Current Batch

We maintain small batch sizes to ensure quality education and individual attention. Seats fill up quickly.
